

Canon U.S.A. Introduces 25 IPv6 Ready Multifunctional Devices.

Government agencies face many challenges as they transition from IPv4 to IPv6 in compliance with OMB Memo M-05-22...ensuring the compliance of office equipment shouldn't be one of them. With the June 2008 deadline approaching, Canon has been investing the resources necessary to make sure that the office equipment government agencies purchase today will be ready for the IPv6 network environment of tomorrow.

The following devices are now IPv6 Ready:
